Non-face-to-face support provisions	Description
Included as standard in all sessions: - up to 15 minutes per 1:1 session - up to 15 minutes per group session (shared cost) - up to 30 minutes per initial assessment	Non-face-to-face support provision ensure our therapists have the time to provide essential additional services that ensure our clients get the best outcomes from each therapy session. These activities do not involve direct hands-on care, yet are integral to ensuring effective treatment and client outcomes and therefore are included in the overall service fee to reflect the comprehensive & high-quality care NeuroMoves provides. Examples of Non-face-to-face support provisions includes reviewing goals and previous progress notes, coordinating with other healthcare professionals and supporters linked to your care, preparing treatment plans, maintaining documentation, sourcing technology and equipment, obtaining quotes, developing high quality reports, documenting & analysing assessment results and developing resources.

*Prices may vary in some locations. **If you feel that these prices are not affordable for you, please contact your local NeuroMoves Team Leader to find out about our subsidies.**
